PROFESSIONAL PROFILE

Computer Engineering student and Full-Stack Developer with production experience focused on web security, JAMstack architecture, and serverless deployment. Possesses a strong foundation in relational databases, REST design, and CI/CD workflows. Analytical, self-taught, and results-oriented professional equipped to build scalable, secure, and user-centric web systems.

TECHNICAL SKILLS

Languages

- JavaScript (ES6+)
- Python
- PHP
- C++, C#, Java

Backend & DB

- Node.js & Serverless
- REST APIs
- MySQL & PostgreSQL
- NoSQL / JSONbin

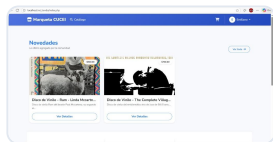

Frontend

- HTML5 & CSS3
- Vanilla JavaScript
- Responsive Design
- API Integration

Tools & DevOps

- Git, GitHub (CI/CD)
- Render, Vercel
- Web Security (CORS)
- English B1 (Intermediate)

FEATURED PROJECTS

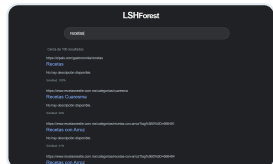

CUCEI University Marketplace | E-commerce Web Application

E-commerce web platform engineered for the university student body to facilitate academic resource trading.

- Architected a SQL relational database for efficient user accounts and inventory item management.
- Integrated the PayPal API as a secure payment gateway to guarantee safe financial transactions.
- Developed core server-side logic in PHP and designed a responsive frontend using HTML5/CSS3/JS.

Tech Stack: PHP, SQL, HTML5, CSS3, JavaScript, PayPal API.

LSH Forest | Similarity-Based Search Engine

Advanced document retrieval engine based on mathematical similarity percentage calculations.

- Developed the core algorithm using MinHash techniques for digital document signature generation.
- Implemented an LSH Forest structure, drastically optimizing sub-linear nearest neighbor search.
- Deployed the cloud architecture using Render and Vercel to ensure maximum availability.

Tech Stack: MinHash Algorithms, LSH Forest, Python/JS, Render, Vercel.

CUCEI Research Group | Scientific Web Portal

Comprehensive web system for managing, filtering, and exhibiting scientific production and patents.

- Built a secure administrative console featuring robust CRUD operations and PHP data persistence.
- Structured a lightweight database storage workflow using JSON to streamline read operation performance.
- Integrated real-time parametric search functionality, custom skeleton loaders, and a native PDF viewer.

Tech Stack: HTML5, CSS3, Vanilla JS, PHP, JSON.

PROFESSIONAL EXPERIENCE

2026

Full Stack Developer | Social Service

CUCEI, Universidad de Guadalajara

- Deployed a university academic portal to production (JAMstack) on Vercel with 11 Node.js serverless endpoints.
- Implemented strict multi-layer security: CORS, CSP, HSTS, X-Frame-Options, IP-based rate limiting, and token auth.
- Managed automated CI/CD workflows via GitHub with Conventional Commits, isolating secrets through environment variables.

Jan 2024 - Present

Junior Backend Developer | Internship

Tech Solutions

- Engineered server-side logic and performed relational database normalization across MySQL and PostgreSQL.

- Configured localized development environments via terminal and collaborated on UI/UX integration (HTML5/CSS3/JS).

EDUCATION

2022 - Present

B.S. in Computer Engineering
Universidad de Guadalajara, CUCEI
